

show me where  
ringtones and other  
electronic sounds  
come from

teach me about the little fragments of music that are used to identify phones, computers and other equipment

- let me hold your phone as it rings
- let me feel the microwave as it beeps
- show me how the doorbell works
- let me listen to the computer start-up sound and show me where it's coming from
- find me toys that play short bursts of music, and show me how they work
- make recordings of the sounds, so I can listen to them just for fun
