give me the chance to make music with other children

card 48

show me and my friends that music can be a great way to make social inclusion work

- start in a small group with songs that I know well and everyone sings the same part
- now try singing in a group where there are different parts being sung
- remember that I can't see the information that other children will be getting through watching …
- find other ways to tell me what's happening (for instance, a discreet tap on my arm from my neighbour, so I know when it's my turn)
- teach me any movements that need to be made to songs before the other children come along to practise
- I might like to play in a children's band or orchestra – remember, you'll need to teach me the music before rehearsals!
